

Fiston 12v on Round Driver Base Brushed N.

Fiston spot / Hi-spot

[NL]

Fiston

De Fiston-spot is een prachtig afgewerkte spot, waarin de lamphouder BA15D volledig in een gegoten kaarshouder is geplaatst. Deze gegoten lamphouder is zwaarder en mooier afgewerkt dan een geforceerde lamphouder. Samen met de grote sierscharnier zorgt hij voor een gaaf afgewerkt geheel. De 12V BA15D-fitting kan naar keuze worden uitgerust met een Halogeen 20 of 50W AR70 van 8° of 24°, of met onze AR70 LED

Fiston Hi-spot

De Fiston is ook verkrijgbaar als GU10 versie rechtstreeks op 220V met HI-spot of LED lamp. Let wel: de HI-spot heeft geen antiverblindende bescherming voor de lichtbron. Dit zal zorgen voor meer verblinding, maar ook voor een meer algemenere belichting met minder contrasten. In combinatie met LED-verlichting is deze toepassing de zuinigste, maar helaas een stukje minder aangenaam.

[FR]

Fiston

Le spot Fiston est un spot magnifiquement fini, sur lequel le soquet BA15D est entièrement placé dans un chandelier en fonte. Ce support de lampe moulé est plus résistant et mieux fini qu'un soquet renforcé. Avec sa grande charnière ornementale, il crée un ensemble parfaitement fini. Le branchement 12V BA15D peut être équipé au choix d'un AR70 de 20 ou 50W de 8 ou 24°, ou encore notre lamp AR70 LED.

Fiston Hi-spot

Le Fiston est également disponible en version GU10, directement connectable au réseau 220V, en HI-spot ou en LED. Remarque: Le HI-spot ne dispose pas de protection contre l'éblouissement. Cela produira plus de luminosité, mais également un éclairage plus général, avec moins de contrastes. En combinaison avec un éclairage LED, cette solution est la plus économique, mais malheureusement un peu moins agréable.

[EN]

Fiston

The Fiston is a beautifully finished spot, in which the BA15D lampholder is placed entirely in a cast candleholder. This cast lampholder is heavier and more beautifully finished than a forced lampholder. Together with the large decorative hinge, it provides a cool, complete finish. The 12V BA15D fitting can be equipped with a 20 of 50W AR70 at 8° or 24°.

Fiston Hi-spot

The Fiston is also available as GU10 version directly at 220V with HI-spot or LED lamp. Remember: the HI-spot has no anti-glare protection for the light source. This will mean more glare, but also a more general lighting with fewer contrasts. In combination with LED lighting, this application is the most economical, but unfortunately a little less attractive.

[DE]

Fiston

Der Fiston-Spot ist ein prächtig verarbeiteter Spot, bei dem der Lampenhalter BA15D vollkommen in einem gegossenen Kerzenhalter angebracht ist. Dieser gegossene Lampenhalter ist schwerer und besser verarbeitet als ein bewehrter Lampenhalter. Gemeinsam mit dem großen Zierscharnier sorgt er für eine tolle Einheit. Die 12V BA15D-Fassung kann nach Wahl mit einem 20 oder 50W AR70 von 8° oder 24° versehen werden.

Fiston Hi-spot

Der Fiston ist auch als GU10-Version direkt für 220V mit HI-Spot oder LED-Lampe erhältlich. Achtung: Der HI-Spot hat keinen Blendschutz für die Lichtquelle. Das sorgt für mehr Blendung, aber auch eine allgemeinere Beleuchtung mit weniger Kontrasten. In Kombination mit LED-Beleuchtung ist diese Anwendung die sparsamste, aber leider etwas weniger angenehm.
