Eligne Wall Chrome 150cm with sensor option

Eligne

[NL]

In de buik van dit strakke toestel zit een dubbele Superior² LED-strip verborgen. Het diffuus licht is naar beneden gericht en ideaal als werkverlichting op een bureau, keuken of aanrecht. Dankzij onze moderne LED-technologie kunt U de verlichting dimmen, waardoor de Kelvin-kleurtemperatuur warmer zal worden. Men kan de strakke vormgeving van het minimalistische profiel combineren met een fijne stalen ophangkabel of juist contrasteren met een brute ketting die zorgt voor een bijzonder geheel. Er zijn ook verbindingstukken beschikbaar waarmee u de toestellen eindeloos kunnen koppelen.

[FR]

Dans le ventre de cet appareil élégant est caché une double bande de LED Superior². La lumière diffusée est dirigée vers le bas et est idéale comme lampe de travail sur un bureau ou sur un plan de travail dans une cuisine. Grâce à notre technologie LED moderne, vous pouvez réduire l'intensité lumineuse, de sorte que la température de couleur Kelvin sera plus chaude. On peut combiner le design élégant et minimaliste avec un fin câble de suspension en acier ou le contraster avec une chaîne brute qui crée une combinaison étonnante. Les éléments qui le composent peuvent encore être modulés et combinés à l'infini.

[EN]

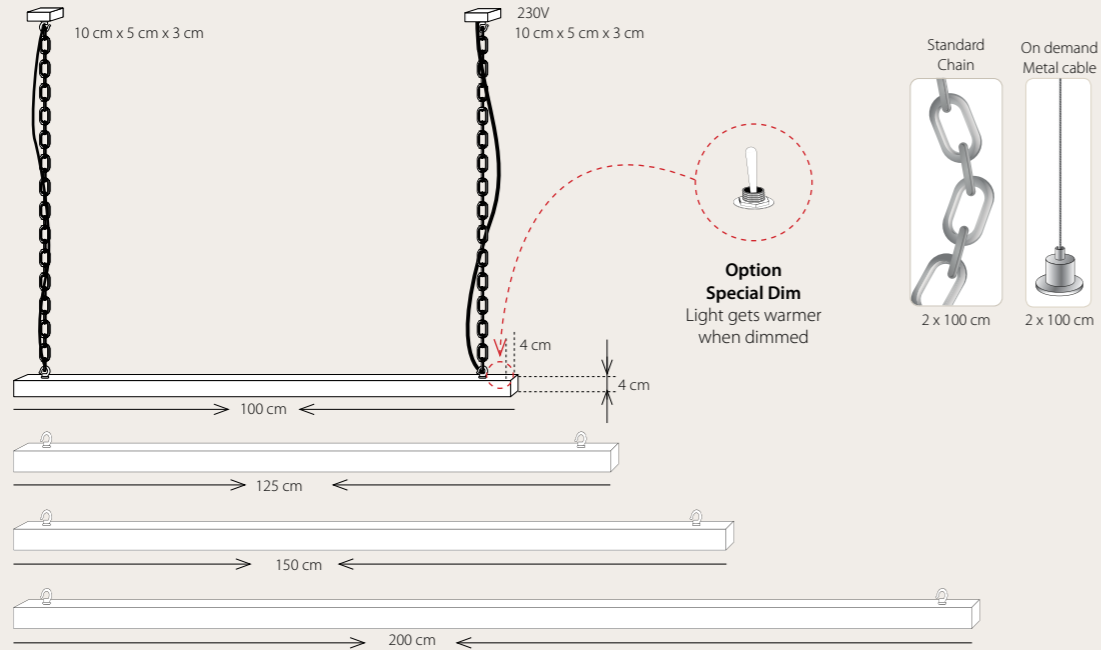

There is a dual Superior² LED strip hidden in the centre of this sleek unit. The diffused light is directed downwards and is ideal lighting for a worktop, desk or kitchen. Thanks to our modern LED technology, you can dim the lighting, which makes the Kelvin colour temperature warmer. You can combine the sleek design of the minimalist profile with a thin steel suspension cable or go for contrast with a rustic chain that creates a special combination. There are also connection pieces available so that we can endlessly combine components.

[DE]

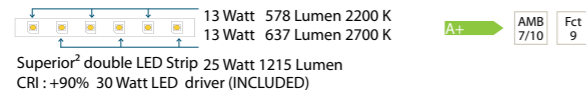

Im Bauch dieses geradlinigen Geräts ist ein doppelter Superior² LED-Strip verborgen. Das diffuse Licht ist nach unten gerichtet und ideal als Arbeitsbeleuchtung auf einem Schreibtisch, in der Küche oder an der Spüle. Dank unserer modernen LED-Technologie können Sie die Beleuchtung dimmen, sodass die Kelvin-Farbtemperatur wärmer wird. Man kann das geradlinige Design des minimalistischen Profils mit einem dünnen Stahlkabel zum Aufhängen kombinieren oder mit einer groben Kette einen Kontrast herstellen, der für einen besonderen Eindruck sorgt. Es gibt auch Verbindungsstücke, mit denen man die Geräte endlos verbinden kann.
